

## FRAM Marked Green business the Baltics/Poland 2016-2017

The program is tailored for Norwegian companies with interest to exploit green business opportunities in the Baltics and Poland. The program is developed in cooperation with Innovation Norway's offices in the Baltics and Poland and is limited to 10 companies.

### Green business opportunities in the Baltics and Poland:

- Clean energy (wind, bioenergy, hydro, solar)
- Green ICT (ICT for energy, transport and logistics, production and trade, e-health, e-government)
- Waste management (waste recycling and recovery of materials, technologies for handling hazardous and organic waste)

### FRAM Marked offers:

- Structured, targeted and sustainable process in your own business with focus on Green market opportunities in the Baltics and/or Poland
- 120 hours of individual consulting support by experienced Norwegian and Baltic/Polish business consultants
- 4 seminars with relevant subjects and individual meetings with potential customers and cooperation partners in the Baltics and/or Poland. Minimum 3 seminars will be held in the Baltics and/or Poland. Duration of seminars in Norway 1,5 day. Duration of seminars in the Baltics/Poland 3-4 days.

### Participant costs:

Participation fee: NOK 30-45.000, depending on final budget.

In addition, the company covers their own travel and accommodation expenses when attending seminars.

### Former FRAM Marked participant about the program:

"Vi har oppnådd både kontrakter, tatt nye posisjoner og fått muligheter både i Tyrkia og India som ellers hadde vært umulig å få til. Gjennom felles framstøt, erfaringsutveksling og nettverksbygging koordinert av engasjert og dyktig prosjektledelse har vi dratt så stor nytte av FRAM marked at det var naturlig for oss å melde oss på et nytt prosjekt mot nye markeder»
